Skills

HTML & CSS
Proficient in **HTML** and **CSS** for building responsive and accessible web interfaces.

Javascript
Experienced with **JavaScript** for building dynamic and interactive web applications.

React.js
Experienced with **React.js** for developing dynamic, component-based single-page applications.

Node.js
Knowledge of **Node.js** for server-side development and handling backend logic.

Projects

Online Malayalam Compiler
Developed an innovative web-based compiler that allows users to write and execute programs using the Malayalam language. The project aimed to make programming more accessible for native Malayalam speakers by enabling code writing in the regional script.

- Designed a custom syntax for a Malayalam-based programming language.
- Built a compiler to parse, interpret, and execute Malayalam code.
- Created a user-friendly web interface for writing and running code.
- Implemented real-time code validation and output display.
- Promoted inclusivity by bridging language barriers in tech education.

Responsive Portfolio Website
Designed and developed a personal portfolio website to showcase projects and skills with mobile-responsive design.

- Created multi-page layout: Home, Projects, Contact
- Used Flexbox and Bootstrap for layout and responsiveness
- Added smooth scrolling and contact form

Education

College of Engineering Aranmula   2021 – 2025
B.Tech   Pathanamthitta
Bachelor of Technology in Computer Science

Interests

Web Development | Building Side Projects | Learning New Programming Languages
